DC Safety Certified to New ISO 9000 Standard

Company passes audits with zero non-conformities while advancing its certification to the latest ISO 9001:2008 standard and the ISO 14001 Environmental standard.

Hauppauge, NY, December 15, 2009 – DC Safety, leading Tier-1 supplier of automotive first aid and mobile preparedness kits, has successfully advanced their certification to the latest ISO 9001:2008 standard for its quality management system, and has been recertified to the ISO 14001 environmental standard after being audited by DNV, an ANAB accredited certification body and registrar.

In a testament to its commitment to continual improvement, DC Safety conformed to all elements of the standards taking no exceptions. The company also had no non-conformities, which is important to note as it is still possible to 'pass an audit' with some non-conformities. DNV's auditor was impressed with the level of detail for management processes and controls throughout the organization, meeting all management standardization requirements. This directly translates to DC Safety's commitment to quality in providing products and services exceeding its customer's expectations.

DC Safety's Quality Management System defines its operational controls governing product design, development, testing, assembly, materials management, product traceability, logistics, customer service and employee training.

In addition to ISO 9000 and ISO 14001, DC Safety is TS16949 compliant, and maintains registrations with the U.S. FDA and as a Health Canada Medical Device Establishment.

It is with great pride that DC Safety maintains a strong Quality Management and Environmental System in spite of these trying times and looks forward to a strong future together with its customers.

About DC Safety

DC Safety is the leading supplier of custom-designed and integrated first aid kits, emergency preparedness and convenience kits for the automotive, transportation and other OEM markets. The company is uniquely positioned to satisfy the dual requirements of both the Tier 1 OE automotive supplier and medical device manufacturer.

Through operational excellence, DC Safety consistently delivers to demanding high volume applications, conforming to strict specifications in packaging, material, content, and branding. The company is ISO 9001 Certified, ISO 14001 Certified, and ISO/TS 16949 Compliant. Kits meet all Federal and Motor Vehicle Regulations and Specifications. DC Safety is a U.S. FDA registered establishment with operations fully compliant to US FDA-GMP. It is a Health Canada licensed establishment and supports global standards MDD Directive 93/42/EEC and ELV 2000/53/EC. It is EDI capable and US EPA initiative and RoHS compliant.
